

MANIFESTO

I, Akshi Bansal (195280009), am contesting for the post of Assistant Treasurer of Mathematics Association for the academic year 2020-21.

Being Treasurer means more than just commitment and enthusiasm. I will be accountable and will take responsibility for financial matters, be transparent in how money is spent, improve and increase efforts for our department, events and integration by getting the most out of our budget.

I can reliably work alone, but just as well in a team. I hope to go beyond my role, helping wherever I can as well as from a finance standpoint.

I intend to work with utmost diligence and carry out my responsibilities in a fair and efficient manner.

If elected for the treasurer of the Mathematics department:

- I will ensure that the funds of the department and its members are managed efficiently
- Will prepare proper budget for year's events and maintain a proper balance sheet throughout the year for all the expenses and savings
- Work closely with the committee
- Save money in every possible way
- Will encourage our association to host some amazing events and trips
- Will work with Alumni Secretary to raise funds for some required infrastructural improvements in the department
- Will put all the best possible efforts in Resource Management in Mathematics Olympiad
- Will coordinate with signatories for the release of fund on time
- Will ensure that Mathematics department's sports team is allotted sufficient fund as per the requirement
- Put forward the initiative to waive off (or reduce) Maths-Assoc/Olympiad fee for students/applicants who're not able to pay
- Will move forward with the aim of making the department—Cash less Society which means paper currency in circulation will be reduced to minimal level and all payments are made through digital mechanism

I'm very approachable, everyone can feel free to drop me an email at any time to share ideas on building a much happier, warmer & cooler department.
